DETAILED ACTION

Drawings

1. The drawings were received on 9 August 2004. These drawings are approved in light of the amendment to the specification.

Allowable Subject Matter

2. Claims 1-5, 8-13, 16, and 33-44 are allowed.
3. The following is an examiner's statement of reasons for allowance:
4. The art of record either alone or in combination fails to teach or suggest the claimed limitations taken as a whole. The art of record generally teaches the claimed limitations pertaining to providing parental control applications utilizing multiple accounts with associated personal identification codes. Taken in combination, the references as set forth in the previous grounds of rejection, disclose the means for tracking and displaying a log of blocked programming that a particular user has viewed. However, the references in conjunction with this form of parental control functionality, do so solely in conjunction with event purchasing such as PPV. The instant application discloses separate embodiments wherein parental control functionality may be related to either purchasing (ex. Figure 31) or based upon other criteria such as program rating information (Figure 33). If alternative elements are positively recited in the specification, they may be explicitly excluded in the claims. See *In re Johnson*, 558 F.2d 1008, 1019, 194 USPQ 187, 196 (CCPA 1977). The newly presented limitations properly exclude the usage of tracking and logging purchases in conjunction with multiple account parental control systems; thereby overcoming both the

rejection and art of record given that there is no suggestion to particularly modify the aforementioned teachings so as to be applicable towards non-purchase based tracking.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- The Hancock et al. (US Pat No. 6,701,523) reference discloses the particular usage of multiple accounts in conjunction with a parental control system.
